

**38\*38CM Heat Press Machine****\$290-350****38\*38cm Heat Press Machine - Compact & Efficient Heat Transfer Solution**

The 38\*38cm Heat Press Machine is a versatile mid-sized heat press designed for small businesses, home-based crafters, and startup apparel brands. Featuring a 38x38cm (15x15 inches) heating plate, it delivers professional-quality transfers on T-shirts, hoodies, mouse pads, hats, and other fabrics with precision and ease.

Key Features:

- ✓ Uniform Heating & Digital Control – High-grade aluminum plate ensures even heat distribution, paired with adjustable digital temperature (0-300°C) for optimal results.
- ✓ Flexible Pressure & Timing – Customize pressure (0-1.2cm gap) and set the timer (0-999s) to suit different materials, from delicate polyester to thick cotton.
- ✓ Dual Operation Modes – Switch between automatic (hands-free) and manual modes for efficient batch production or detailed projects.
- ✓ Compact & Durable – Robust steel construction with a heat-resistant handle and safety lock for stability during use.
- ✓ Multi-Material Compatibility – Works flawlessly with sublimation paper, vinyl, HTV, and other heat-transfer designs.

Perfect for small-scale production or hobbyists, this 38\*38cm Heat Press Machine combines user-friendly operation with professional output. Achieve crisp, durable transfers every time!

Technical Parameters:

Hot stamping area: 38cm×38cm

Voltage: 110v/220v

Work rate: 1800W

Temperature range: 0-240°C □

Time range: 0-999sec

Weight: 22kg

Operating procedures:

1. Plug in the power supply by hand, turn on the power switch, and the power indicator light indicates;
2. Adjust the thermostat to the desired temperature, and when the temperature reaches a certain temperature, the indicator light on the upper part of the thermostat goes out, and you can start working;
4. Set the timer to the required time;
5. Lay the clothes flat on the lower ironing board, fold the heat transfer paper (please pay attention to the front and back of the heat transfer paper), and press the handle down firmly to the end;
6. When the set time for indicating hot stamping is up, the alarm prompts (buzzer sounds), and the handle is returned to its original position.
