

## Automatic CD Printer PVC ID Card Printer

**\$880-1200**

Automatic CD/DVD & PVC ID Card Printer - Professional Dual-Function Printing Solution

The Automatic CD Printer & PVC ID Card Printer is an industrial-grade digital printing system designed for high-volume production of professional-quality CDs, DVDs, and PVC ID cards. This advanced dual-function printer combines precision inkjet technology with automated handling to deliver exceptional print results for replication businesses, government agencies, educational institutions, and corporate ID departments.

Technical Specifications & Features:

Printing Capabilities:

Dual-function design prints on both optical media (CD/DVD/Blu-ray) and PVC cards

Print resolution up to 1440 x 1440 dpi for photorealistic image quality

CMYK + White ink configuration (optional) for vibrant colors on all media types

Media Handling:

Automatic CD/DVD feeder capacity: 100 discs (standard)

PVC card input capacity: 100 cards (standard)

Media thickness range: 0.3mm to 1.5mm

Supports various card types: CR80, CR79, and custom sizes

Advanced Printing Technology:

Industrial-grade piezoelectric print head for precise ink droplet control

UV-resistant, scratch-proof ink formulation

Integrated drying system for immediate handling of printed items

Automatic media detection and alignment

Production Efficiency:

Print speed up to 1,000 CDs/DVDs or 300 PVC cards per hour

24/7 continuous operation capability

Network connectivity for centralized print management

Compatible with major design and database software

Applications:

Professional CD/DVD replication services

Government and corporate ID card production

Membership and loyalty card printing

Event credentials and access control cards

## High-security printing with optional holographic overlay

This industrial printing solution combines reliability, speed, and exceptional print quality to meet the demands of professional media production and secure identification systems. The automated operation minimizes labor requirements while maximizing output efficiency.

Quality mode: 80s/pc(photo resolution, CD/DVD)

Speed mode: 30s/pc(Photo resolution, photo quality ink jet)

1set ink(6 colors,100ml per color) can print about 4000-5000pcs CD/DVD disc.

1set ink(6 colors, 100ml per color) can print about 5400~6000pcs pvc card.

Automatic continuous feed tray out tray.

We will calibrated the head nozzle by special tool to keep high printing resolution before out of the factory for everything printer.

## 1 FEATURES

**Ink:** Pigment ink or Dye ink.

80ml ink for every color, which could print thousands of CD/DVD.

Send ink special reset software, which reset the ink and remaining amount to 100% at any time, no half-disc printing! Reduce the loss of nearly 200 CD/DVD for customers every month.

**Quality mode:** 80s/PC(photo resolution, CD/DVD);

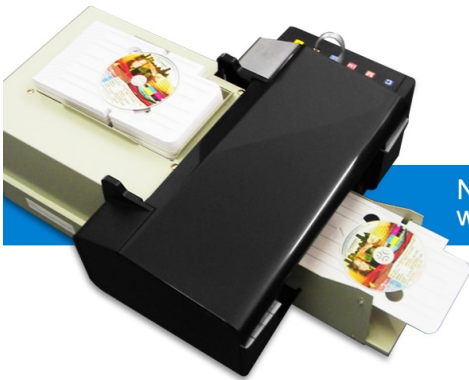

**Speed mode:** 30s/PC(Photo resolution, photo quality inkjet);

1set ink(6 colors, 100ml per color) can print about 4000-5000pcs CD/DVD dis.

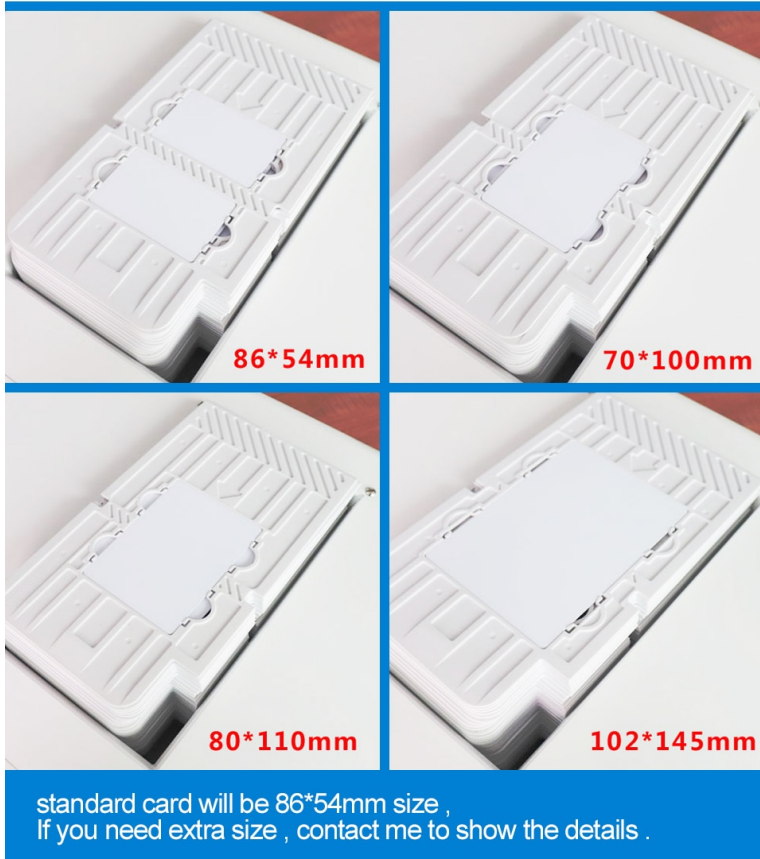

1set ink(6 colors, 100ml per color) can print about 5400-6000pcs PVC cards.

## 2 ADVANTAGES

New and high quality,  
which could print 4 sizes .
