

## A3 Roll DTF Printer

**\$1180-1390**

### A3 Roll DTF Printer – High-Quality Direct-to-Film Printing for Custom Apparel

The A3 Roll DTF Printer is an advanced and efficient solution for businesses looking to create high-quality custom prints on a wide range of fabrics. Perfect for T-shirts, hoodies, hats, and other apparel items, this printer uses Direct-to-Film (DTF) technology to produce vibrant, long-lasting prints with exceptional detail. Whether you are a small business or a larger-scale operation, the A3 Roll DTF Printer offers reliability and efficiency for all your printing needs.

With six-color printing (CMYK LC LM + White), this printer ensures that your designs pop with vivid colors, even on dark fabrics, thanks to its ability to print white ink. The print quality is sharp, consistent, and durable, making it ideal for a variety of custom garment applications. The CISS (Continuous Ink Supply System) ensures uninterrupted printing, lowering the overall cost per print and enhancing productivity.

The A3 Roll DTF Printer is designed for maximum flexibility, supporting roll-fed media for larger print runs and providing the option for both high-speed and high-quality prints. Whether you need to produce small batches for promotional items or large orders for fashion lines, this printer can handle it with ease. Its user-friendly interface and quick setup make it a great addition to any custom printing business.

#### Key Features:

- Six-Color Printing: CMYK LC LM + White ink for vibrant, detailed designs
- High Resolution: Capable of printing at 5760\*1440 dpi for professional-quality output
- CISS Support: Continuous Ink Supply System for cost-effective, long-duration printing
- Flexible Media Support: Ideal for T-shirts, hats, and other fabric-based items
- User-Friendly: Easy to set up and operate for businesses of any size

Unlock new possibilities in custom garment printing with the A3 Roll DTF Printer—a perfect solution for bringing your designs to life with high-quality, long-lasting results.

#### Product Details:

- Spray Head: EPSON L805 head nozzle count: 6 \* 180
- Print Width: A3 size, supports unidirectional and bidirectional printing

- Widest Printing Support: 329mm
- A3 Machine Size: 53 \* 38 \* 15 CM
- Net Weight of Printer: 8.5 KG
- Printer Packaging Size: 60 \* 60 \* 27 CM
- Weight (Including Wooden Box): 19 KG
- Software Support: RIP 10.3

Advantages:

1. Self-Developed Motherboard: Replaces the original EPSON motherboard.
  - No EPSON waste ink reset.
  - Eliminates various sensor malfunctions and error flashing typical of EPSON machines.
  - Enables continuous roll-to-roll printing.
  - Supports single-page printing.
2. Automatic Cleaning: Ink pump can be cleaned without removing the film. No need to reinstall the film after cleaning.
3. No Film Slippage: During printing, the film remains in place. There is no restriction on the thickness of PET film or whether it's double-sided matte.
4. EPSON Structure Preservation: Maintains the EPSON structure without increasing printer volume.
5. White Ink Mixer: Comes with a standard white ink mixing system, which automatically mixes the ink at set intervals.
6. Sturdy Packaging: The printer is packaged in a steel plate box for durability, with space to store one roll of 100-meter long PET film.
