

Roll Laminator Single Side Laminating Machine

\$120-160

Single-Sided Electric Laminating Machine – For Crystal Stickers, Photo Books, Labels & More

This Single-Sided Electric Laminator is a versatile solution for both hot and cold lamination, specially designed for processing self-adhesive crystal labels, photo books, nameplates, and printed materials requiring surface protection and a professional finish. Whether you're working with glossy film, transparent stickers, or photo paper, this laminator delivers smooth, bubble-free results with ease.

Featuring an electric motor for steady pressure and operation, it simplifies the lamination process while increasing production efficiency. It supports single-sided lamination, making it ideal for custom sticker production, craft projects, signage protection, and document finishing. The machine is easy to operate and requires minimal maintenance, perfect for print shops, studios, and home businesses alike.

For this laminating machine, we have 3 options: **Fixed speed version, Adjustable speed version and Adjustable speed with screen version**

Key Features:

- Supports Hot & Cold Lamination for different film and media types
- Electric-Driven Operation for consistent pressure and smooth results
- Ideal for Crystal Labels, Photo Books, Nameplates, Posters, and Stickers
- User-Friendly Design with simple controls and adjustable settings
- Compact Structure suitable for desktops or limited workspaces

Upgrade your lamination process with this professional electric single-sided laminating machine—your go-to tool for clear, durable, and high-quality finishes.
